EDUCATION

Information Technology School - ITS

Computer Multimedia Engineer for Information Technology

2016 - 2021

Courses - Vue JS

Esenca Software

2021 - 2022 (6 months)

Courses - English Classes

Tesla Academy

2023 - now

SKILLS

HTML / CSS / SCSS

Bootstrap / Tailwind

JavaScript / VueJS

Vue Router / Vuex / Vuetify / Axios

Figma / Adobe Photoshop / Adobe Illustrator

Hello, I'm Đorđe

After creating over 40+ websites using HTML, CSS, and JavaScript, I started exploring and learning Vue.js, a new technology that immediately caught my attention because of its simplicity and flexibility. Soon, I began building web applications using Vue.js along with Vuex and Vue Router, creating elegant and intuitive user interfaces.

Using Vue.js, I have developed a variety of projects, including different web applications, websites and hybrid mobile applications. I leveraged my knowledge of CSS and HTML to design beautiful user interfaces using libraries like Tailwind, Bootstrap, and Vuetify. Working with my team, I have contributed to various projects, working on design, development, and implementation.

EXPERIENCE

FRONTEND DEVELOPER

AppWorks, Belgrade   April 2021- NOW

As a frontend programmer in the company, I had the pleasure of creating unique solutions and enhancing user experience through the integration of frontend technologies. I applied my skills and expertise in developing websites, web applications, and hybrid mobile applications using HTML, CSS, Bootstrap, delivering aesthetically appealing and intuitive designs, and implementing functionalities through JavaScript and Vue.js.

I am particularly proud of my contribution to the development of hybrid mobile applications. By utilizing HTML, CSS, Bootstrap, JavaScript, and Vue.js, I successfully created mobile applications that combined the power of web technologies with the advantages of mobile platforms. These hybrid applications stood out in terms of speed, portability, and intuitive user interface.

The design and implementation of mobile applications involved adapting functionalities and designs to specific user needs. Through analyzing user requirements, I developed creative solutions that provided users with intuitive and enjoyable user experiences.

One of the most important aspects of my job was successful teamwork and constant communication with backend programmers. Through collaboration, we worked together on implementing functionalities and secure data exchange between the frontend and backend parts of the application. This dynamic interaction enabled the creation of integrated and optimal solutions for our clients, and we achieved synchronized integration between the frontend and backend components of the applications.

Working as a frontend programmer in this company was both challenging and rewarding, allowing me to enhance my skills and expertise. I take pride in my contribution to the development of hybrid mobile applications and achieving effective communication with the backend team.

WEB DESIGNER / WORDPRESS INTERN

The Social Formula, Belgrade   June 2020 - October 2020

My first steps in the business world. I was surrounded by a fantastic team who generously shared their knowledge with me. I created website designs in Figma for new clients, and after the design was approved, I worked on implementing them in WordPress.
